Syntax Errors:

1. `cout << "Area of the circle is: " << area endl;`

wrong symbol on `area endl`. Change to `area << endl`

Correction :

`cout << "Area of the circle is: " << area << endl;`

2. `cin << length;`

`cout << "Enter the width of the rectangle: ";`

`cin << width;`

wrong symbol on `cin` function causing cannot run correctly

Correction :

`cin >> length;`

`cout << "Enter the width of the rectangle: ";`

`cin >> width;`

3. Line 28 wrong symbol on `if ((length > 0) || (width > 0))`

Correction:

`if ((length < 0) || (width < 0))`

Logic Errors:

1. Pi was not declared causing calculation cannot be make

Correction :

```
int main() {  
  
    int choice;  
  
    double radius, length, width, area ;  
  
    double PI = 3.142;
```

2. Did not declare #include <cmath> causing power on line 18 cannot be used

Correction :

```
#include <iostream>  
  
#include <cmath>
```

3. cout << "Enter the length and width of the rectangle: ";

```
cout << "Enter the length of the rectangle: ";
```

```
cin >> length;
```

```
cout << "Enter the width of the rectangle: ";
```

```
cin >> width;
```

Don't need to print out two time

Correction :

```
cout << "Enter the length of the rectangle: ";
```

```
cin >> length;
```

```
cout << "Enter the width of the rectangle: ";
```

```
cin >> width;
